

S HARSHA VARDHAN

harsha.sdm111@gmail.com | 9490317285 | linkedin.com/in/harsha-varadhan-39aa47183 | Hyderabad, India

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 2+ years architecting scalable full-stack applications using Java, Spring Boot, Node.js, and React. Expert in microservices architecture, system design, RESTful APIs, and CI/CD automation on AWS. Proven track record optimizing high-traffic APIs (40% latency reduction), implementing AI-powered solutions with RAG, and delivering enterprise-grade applications. Proficient in Docker containerization, JWT authentication, and agile SDLC methodologies.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frameworks: Spring Boot, React.js, Redux, Node.js, Express.js, Tailwind CSS, Webpack, Socket.io

Cloud & DevOps: AWS (EC2, S3), Docker, Jenkins, GitHub Actions, CI/CD Pipelines, Git

Databases: MySQL, MongoDB, SQL Query Optimization, Redis Caching

Core Expertise: Microservices Architecture, System Design, RESTful APIs, JWT Authentication, WebSockets, WCAG Accessibility, Responsive Design, Web Performance Optimization, Agile Methodologies, AI/ML Integration (RAG)

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2023 – Present

Sureify Hyderabad, India

- Architected scalable backend platform with Java Spring Boot and Node.js, implementing Redis caching and algorithm refactoring that reduced API latency by 40% for high-traffic insurance applications
- Engineered reusable Price Illustration Microservice using Spring Boot with JWT-secured REST APIs, standardizing business logic across multiple products and reducing code duplication by 60%
- Optimized database performance through advanced SQL query tuning and indexing, decreasing data retrieval times by 35% for complex client-facing applications
- Orchestrated CI/CD pipelines with GitHub Actions and Jenkins, automating Docker containerization and AWS deployment, achieving 99.8% uptime and 50% faster releases
- Collaborated in agile sprints to develop responsive React components with WCAG compliance, implementing API monitoring dashboards for enhanced system stability

Software Engineer Intern

Feb 2023 – Nov 2023

Sureify Hyderabad, India

- Developed full-stack Poll Dashboard using React.js and Node.js/Express with real-time visualizations, reducing reporting time by 70%
- Designed secure RESTful APIs with JWT authentication and deployed on AWS EC2 using automated CI/CD pipelines

Software Engineer Intern

Jul 2022 – Feb 2023

Ennea Solutions Hyderabad, India

- Developed discount and offer features for pharmaceutical stock management application using Spring Boot with clean architecture principles
- Designed responsive React UI components for CSV data visualization, improving user workflow efficiency by 45%

KEY PROJECTS

Repo AI – AI-Powered Repository Assistant

- Architected AI conversational agent using Retrieval Augmented Generation (RAG) enabling natural language querying of codebases with 85% accuracy
- Engineered robust backend pipeline processing repository data in real-time, delivering intelligent responses through interactive chat interface

Airforce Communication Hub

- Built full-stack collaboration portal with React, Node.js, and MongoDB featuring WebSocket real-time messaging (Socket.io) supporting 500+ concurrent users
- Implemented JWT role-based authentication and deployed on AWS (EC2/S3) with automated CI/CD pipeline using Docker

Code Editor Sandbox

- Developed browser-based code editor with React and Spring Boot backend, integrating Piston API for secure multi-language code execution
- Implemented session-aware workspace management with WebSocket communication for real-time collaboration capabilities

EDUCATION

Bachelor of Technology in Computer Science

Graduated June 2023

Sreenidhi Institute of Science and Technology

Hyderabad, India
